Managed security
Proactive managed security for enterprise environments.

Managed IT infra
Process-driven on-prem, cloud and hybrid infra-structure management for enterprises.
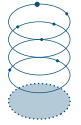

Automation & GRC
AI-enabled automation for IT ops, and risk mitigation through governance & compliance programs.

Cloud Solutions
End-to-end tailor-made cloud solutions for your data, apps, backup and DR workloads.

ASPLXen: Managed services for SMBs
Enterprise-grade managed IT for SMBs covering infra, security, asset management and more.
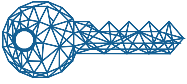

Database services
Process-driven database management ensuring optimum efficiency and high availability, security, and performance.

Professional services
Specialized IT services and project management for enterprise transformation initiatives.

Managed resources
Qualified and experienced specialists for high-technology enterprise projects.

Managed security

24x7 monitoring and managed services for IT security, through our Security Operations Center (SOC). Our SOC offers best-in-class security services to help you mitigate security risks, and react quickly and effectively in case of an attack. We offer managed security services through onsite, remote and hybrid models.

- Managed security operations
- Managed security devices

Managed IT infrastructure

End-to-end monitoring and management of your enterprise IT infrastructure — network, security, database, operating systems (OS), backup, and more.

Our experts manage your infrastructure, lower your TCO, optimize IT hardware and software, enable end-to-end visibility through a single dashboard, eliminate the need for full-fledged internal IT teams, and prevent network disasters.

- Networking and security
- Backup and DR
- Cloud services
- Computer and storage
- Virtualisation
- Operating systems

Automation and GRC

Single-stack operations and asset management for ITOM solutions, and support across Governance, Risk and Compliance (GRC) initiatives.

We help you resolve performance and availability issues, set baselines and guardrails, measure service impact, and identify risks throughout the system. Our GRC practice helps you improve corporate governance, assess business risks, and increase the effectiveness of your organization's control mechanisms

- Service, asset and ops management
- Robotic process automation
- Governance, risk and compliance

Cloud Solutions

Flexible, scalable, secure, pay-as-you-use IT infrastructure and custom-built cloud solutions for enterprises.

Our cloud experts will architect cost-effective infra solutions for your data, applications, backup and DR workloads at our highly advanced and secure data center, with 24×7 rapid action support team.

- Virtual private cloud
- Backup as a service
- DR as a service
- Managed cloud services

asplxen Managed services for SMBs

Enterprise-grade managed services to small and medium enterprises, managing IT end-to-end, empowering them to focus on their core business.

We handle the entire range of your IT operations — assessing your current infrastructure, planning and designing changes, proactive service improvements and performance enhancements that will give the customer reduced downtime and better ROI.

- End-to-end IT infra management
- Infra monitoring
- Value-added services
- ITIL-based service desk
- Asset management
- End-user support

Database services

End-to-end database management for your enterprise.

Our qualified IT experts manage your database 24×7 for optimum efficiency and high availability, security, and performance.

- Disaster recovery and high availability
- Security
- Database performance optimisation
- Database backup, restore and recovery
- Monitoring and troubleshooting
- Database admin and support

Databases managed

Oracle Database   Microsoft SQL Server   My SQL   Mongo DB

Professional services

Professional services — short-term engagements to handle one-off projects — across the security, network, application and infra landscapes.

Our professional services team can end-to-end projects, including planning, strategy, design, implementation, training, and support.

- Security assessments
- Network and security
- Vulnerability management
- Application and infrastructure services

Managed resources

Highly skilled and experienced resources across the tech landscape.

We have a team of over 200 IT specialists, who are continually upskilling in the latest technologies. We employ subject matter experts across the entire gamut of IT management who are able to work onsite or offshore.

- Security
- Database management
- ITIL-SD
- Networking operations
- Backup and DR
- Server management
- Storage management
- Application management

Preparing you for greater ambition

ASPL is a managed-technology company delivering process-driven, proactive, state-of-the-art managed services for enterprises and SMBs alike.

We do things well.
With over 15 years in business, we have securely managed IT infrastructure, and successfully delivered IT services to clients globally — blue chip biggies as well as mid-sized organizations across industries.

We do things right.
At ASPL, we are process-driven. With our proven service delivery methodology, robust service automation platform, and thoughtful investments in processes, people and technology, we simplify your IT operations and curb your costs.

We do things fast.
We help you thrive in a fast-changing digital landscape that requires your IT operations to be agile. We ensure shorter transition times, zero service disruption, seamless steady state support, and quick adoption of innovation.
